

SAFE, SECURE & EASY TO IMPLEMENT NETWORK CONTROL

IP-Based
Access Controllers

IPDSE

Door Station Expansion Board

IPDCE

Controller Board

WHAT YOU NEED TO KNOW:

Bring safe, secure, easy to implement door access control to the network's edge without the headaches of costlier, more complicated enterprise solutions. No proprietary software to install and maintain. Program a single or multi-door access control system in minutes- not hours.

SDC IPPro® IP-based single door access controllers are now available with two ethernet ports for interfacing with an additional IP devices like cameras, additional door controllers, etc. They allow expansion from one standalone door up to a 100-door "grid." The additional ethernet port allows IT departments to save a port when connecting an extra door at the server. Installers can eliminate a long cable run when connecting an additional IP device.

Every IPPro® controller comes with secure, built-in software to manage up to 32 doors from any standard web browser to allow for real-time monitoring, user management and audit trail up to 5,000 events. Or, download our free plus PC-client software to control up to 100 doors from a single PC. IPPro® PLUS is a role-based access control software suite with different interface modules. SDC IPPro® injectors and splitters are also available to help create a complete solution.

HOW YOUR CUSTOMER BENEFITS:

- Expandable single door IP controller
- Connect and power with existing ethernet network infrastructure
- Secure, built-in browser based software
- Program an access control system in minutes, not hours
- Manage from any PC via web browser
- Proximity, smart card and weigand readers
- Reduce cabling and labor cost when compared to traditional panel based access control
- Combine with SDC's PoE access control and electrified locking hardware for virtually any application
