Returned Material Policy: Any defects or errors for which we are responsible will be promptly rectified. Approval for return of merchandise must be requested of us, and when granted, **the return authorization number must be displayed on all packages returned.** All circuit board assemblies must be returned in their original packaging or approved static safe bag. If one is not available to you, we will supply one upon request. Improperly packed items may result in product damage, added repair charges and may void the product warranty. Material found suitable for resale without reconditioning will be credited to customer's account less a handling and reprocessing charge of **35% of the net material value.** Further charges will be assessed on material requiring rework to return it to saleable condition. Outdated and obsolete products will not be accepted for return. Items manufactured to a special finish, options, size or pre-assembly configuration are considered special and are not returnable for credit. Incoming transportation charges are to be prepaid by the Buyer. Credits for material returned will have 2% deducted to cover the cash discount allowance on the original invoice. See current Price List for complete Sales Policy and Warranty Information.
