

# 470 Series

## No Touch Sensors

**SDC's 470 series touchless switches use active IR sensor technology.** A simple wave of the hand in front of the 470 touchless switch activates the switch to control electric locks/ strikes, magnetic locks or automatic door operators for entry or egress. 470 series touchless switches come standard with an adjustable 2"-7" activation read range.

**The dual LED, illuminated sensor, clearly indicates status.** The red LED indicates inactive status, which changes to a temporary green LED state to indicate activation. Ideal for, but not limited to, facilities that require contamination control. Touchless switches help **reduce the spread of infection and disease** in any application.

- Wave-to-open activation
- Active IR sensor technology
- Adjustable sensing range 2"-7"
- Illuminated dual LED sensor
- Durable stainless steel faceplate
- 8" wire harness
- Field selectable dual voltage
