

LATCH RETACTION & TRIM CONTROL FOR MORTISE APPLICATIONS

Motorized Latch Retraction & Solenoid Controlled Mortise Locks

7700

MLR & Solenoid Controlled Mortise Lock

WHAT YOU NEED TO KNOW:

SDC's 7700 series motorized latch retraction and solenoid controlled mortise locksets incorporate a grade 1 heavy duty mortise lockset and vandal resistant clutch – proprietary to all SDC locksets. The motorized latch retraction feature is designed for use on fire rated doors to provide access control and building and fire life safety compliance. Door stays latched even when de-energized. **Ideal for automatic door operator applications.** The solenoid controls the inside, outside or both door levers. The MLR and solenoid features operate independently to combine versatile passage functionality with failsafe or failsecure access control while meeting ADA Compliance. All SDC mortise locks feature a mortise cylinder to manually retract the latch.*

* Key cylinders sold separately.

HOW YOUR CUSTOMER BENEFITS:

- Heavy duty mortise design
- New or retrofit construction
- Vandal resistant clutch
- MLR and solenoid control
- Key latch retraction
- Schlage trim compatible
- Request-to-exit (REX) optional
- Latch status (LS) optional
- Trim options
