WHAT YOU NEED TO KNOW:

The **SDC EntryCheck® E75 Privacy** is a **low-cost**, indoor/outdoor standalone electronic **battery powered** solution, providing controlled access for basic and multi-level convenience. It's perfect for **new or retrofitting** of **gas station**, convenience store, fast food, coffee house or retail store **restroom facilities** - **no wiring or power supplies required**.

Customers or employees can be provided an **access code** to enter on the keypad to access the room. Once inside with the door closed, **simply push the RED button to activate** the Privacy function. The **RED LED's** on the outside keypad and inside battery cover **flash to indicate occupation**. Activation of the Privacy mode locks out the keypad. When turning the inside lever to leave, the Privacy function is deactivated and the lock is ready again to accept another user.

Signage clearly indicates Status and Function, so **no user instructions** are required. Management can **override the Privacy function** in case of emergency with a **Key or Master Code** or to clear room occupants who have overstayed their welcome.
