INSTALLATION INSTRUCTIONS
E1200-390MP RETROFIT MOUNTING PLATE

The E1200-390MP Mounting Plate provides the simplest and most economical solution for retrofitting Locknetics 390+ Series lock:
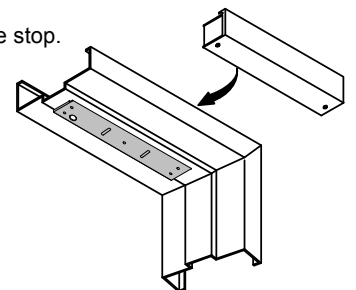

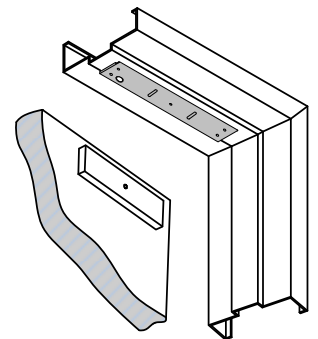

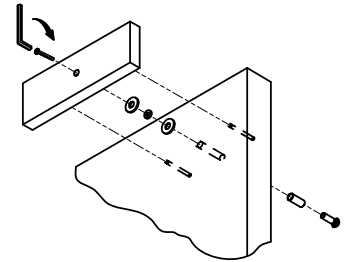

The E1200-390MP utilizes the existing mounting plate holes to mount SDC's E1200 Excel^{TM} Series lock (sold seperately).

Advantages:
- Saves valuable time by using the existing door and header prep. No additional holes are required through the door.
- All required hardware is included.
- Utilizes SDC's E1200 Excel™ Series lock with Door & Lock Monitoring options standard.

E1200-390MP Installation:

- Mount the new armature to the door using the existing sexbolt hole and the supplied hardware.

- Install the new mounting plate using the existing mounting plate holes and the supplied hardware.

- Locate the wire hole on the new mounting plate & drill a 3/8" dia. hole through the header.

- Attach the SDC lock onto the new mounting plate with the magnetic stripes towards the door side of the stop.
