WIRING FOR VON DUPRIN POWER SUPPLY

SINGLE DEVICE

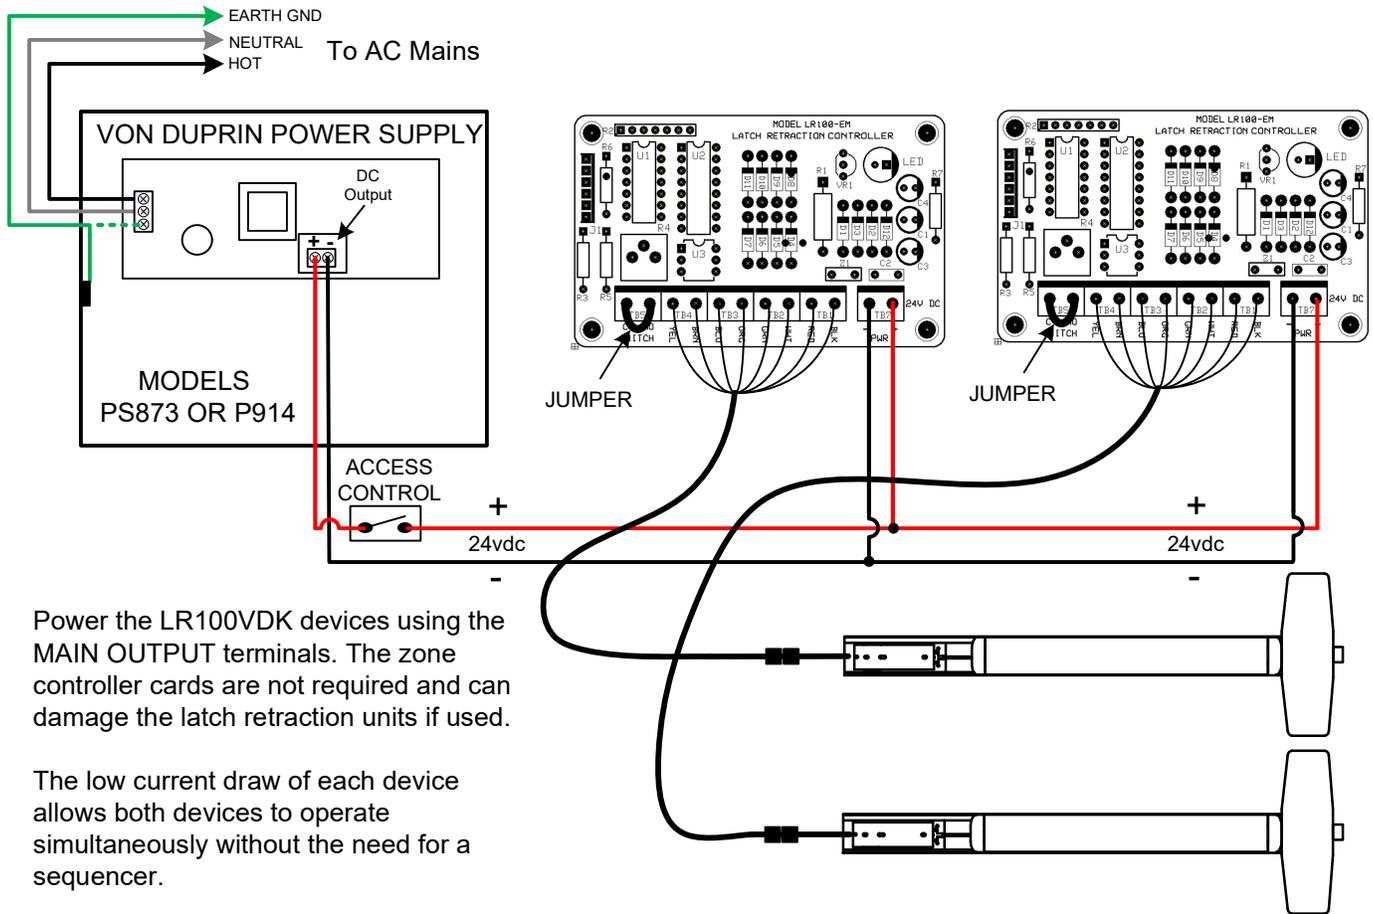

- Power the LR100VDK devices using the MAIN OUTPUT terminals. The zone controller cards are not required and can damage the latch retraction units if used.
- The low current draw of each device allows both devices to operate simultaneously without the need for a sequencer.

Wire colors from provided Pigtail must connect to the same colors marked on PCB. If the Jacketed Cable does not have the same colors as the Pigtail, use the following chart to mark the color connections from Pigtail to Jacketed Cable to PCB.

<u>PIGTAIL</u>	<u>JACKETED CABLE</u>	<u>PCB</u>
