MITIGATE LIABILITY, ENSURE FUNCTIONALITY

Door-Mounted Presence Sensors for Door Operators

AUTO-IR36Y
Presence Sensor, 36"

AUTO-IR48Y
Presence Sensor, 48"

WHAT YOU NEED TO KNOW:

Every low energy door operator should be ordered with an AUTO-IR presense sensor to mitigate liability.

The AUTO-IR accessory mitigates liabability through re-activation of door before contact is made during the closing cycle, protecting slow-moving people as well as people trailing behind. It reliably detects stationary as well as moving objects in the swing path of an automatic door. When using the AUTO-IR mounted on the application side of the door, the need for an extended hold open time is eliminated, allowing the door to begin the close cycle after the minimum 5 second hold open time has elapsed.

Using the AUTO-IR presence sensor exceeds ANSI 156.19 standards by offering a contactless experience, further mitigating liability.

HOW YOUR CUSTOMER BENEFITS:

- Simple, one-button calibration setup
- Dual sensors to ensure presence activation*
- Smooth and safe operation of door
- Exceeds ANSI 156.19 standards
- Proven active IR technology for distance measurement through triangulation
- Optional programming to customize settings

* AUTO-IR48 models only.
