

S6300-101 Series

All-In-One Delayed Egress
Mortise Exit Devices

SDC's S6300-101 series all-in-one devices integrates the S6300 series mortise exit device with SDC's innovative delayed egress electronics.

When unauthorized egress is initiated by depressing the push pad of the S6300-101, an audible alarm will sound and an irreversible delay period of 15 seconds will begin. After the delay period has expired, the device unlocks, permitting egress until the device is reset. In a life safety emergency, the device will immediately unlock upon loss of power or when powered by a fire control supervised power supply.

- Panic and fire rated devices
- Subdued alternating alarm
- Push pad activation trigger
- Key switch reset and bypass*
- Low power consumption, energy saver

*Key cylinders not included, order separately. See related products.
