

SDC Selectric®

ELECTRIFIED MORTISE LOCKS FOR ACCESS CONTROL

Solenoid Controlled
Mortise Locksets

7800PRO
SDC Brand

7800MOD
Customer Supplied

WHAT YOU NEED TO KNOW:

SDC's Selectric® 7800PRO and 7800MOD series

locksets replace existing mechanical or electrified mortise locksets for the access control of openings in commercial, industrial and institutional facilities where code compliance, dependable operation and resistance to physical abuse is required. These code compliant electric mortise locksets stay latched even when unlocked, maintaining fire door integrity and eliminate the need for surface magnetic locks and request-to-exit (REX) hardware.

The **7800PRO series** incorporates a grade 1 heavy duty mortise lockset and vandal resistant clutch – proprietary to all SDC Selectric® Pro locksets. They replace most brands of mechanical locksets making them fully compatible with new and retrofit applications and provide field select ability of all operational attributes.

The **7800MOD series** electrifies customer supplied new or existing mechanical brands of mortise locksets. Simply send the brand lockset of your choice to SDC for electrification. Brands compatible for SDC modification include: **Schlage, Yale, Falcon, Arrow, Marks, PDQ, Dorma, Corbin Russwin, Sargent, Hager, Best and Cal Royal**. Only storeroom function mortise lock chassis can be electrified.

HOW YOUR CUSTOMER BENEFITS:

- Heavy duty mortise design
- New or retrofit construction
- Vandal resistant clutch
- Solenoid control
